Technical writing can be a very useful form of writing and communication for research papers, projects, lab reports, instructions, diagrams, and many other forms of professional writing. The workshop aims to facilitate students of B.E, M.Tech and Ph.D in writing research papers and formatting project documentation.

LaTeX, a suite of (largely shareware) typesetting software, has been adopted by the majority of researchers for the preparation of technical documents. This workshop provides some hands-on training in LaTeX .
