FACULTY OF ENGINEERING B.E. 2/4 (Common to All Except – IT) I Semester (New) (Main) **Examination, December 2011 MATHEMATICS - III**

Time: 3 Hours] [Max. Marks: 75

Note: Answer all questions from Part A. Answer any five questions from Part B. PART – A (25 Marks) 1. Form the partial differential equation by eliminating the $z = ax + bv + a^2 + b^2$. 3 2. Form the partial differential equation by eliminating the articles $z = f(x^2 = y^2).$ 3 3. Define periodic function and give an example. 2 4. Define even and odd functions. 2 5. Solve by separation of variables method for $u_x = u_y$. 6. Write the one dimensional heat flow equation and wave equation. 2 7. Write Regula-Falsi iteration formula to find a root of the equation. 8. Explain Bisection method. 3

9. Find Z transform of $\{e^{-3n}\}$.

11. a) Solve $x^2 (y-z) p + y^2 (z-x) q = z^2 (x-y)$.

displacement y (x, t).

10. Find the Z transform of $(n+1)^2$. 3 PART - B (5×10=50 Marks)

b) Solve $2z + p^2 + qy + 2y^2 = 0$ by Charpit's method. 12. A tightly stretched string with fixed end points x = 0 and x = l is initially in a position given by $y = y_0 \sin^3(\pi x/I)$. If it is released from rest from this position, find the

- - 13. Solve $q^2r 2pqs + p^2t = pq^2$ by Monge's method.
 - 14. a) Expand $f(x) = x \sin x$ as a Fourier series.

 - b) Obtain Fourier series for the function f(x) given by $f(x) = \begin{cases} 1 + \frac{2x}{\pi}, & -\pi \le x \le 0, \\ 1 \frac{2x}{\pi}, & 0 \le x \le \pi \end{cases}$
 - 15. a) Find the inverse Z transform of $\frac{2z}{(Z-1)(Z^2+1)}$.
 - b) Using the Z-transform, solve
 - $u_{n+2} + 4u_{n+1} + 3u_n = 3^n$ with $u_0 = 0$, $u_1 = 1$.
 - 16. a) Using Newton-Raphson method, find a root of the equation $x \sin x + \cos x = 0$.
 - Find the first derivative at x = 1 for the following values of x and y:

 - y: 0 1 5 21 27
- - 17. a) Using Euler's method, find approximate value of y when x = 0.6 of $\frac{dy}{dx} = 1 2xy$,

given that y = 0 when x = 0 (take h = 0.2).

solve $\frac{dy}{dx} = \frac{y^2 - x^2}{v^2 + x^2}$ with y(0) = 1 at x = 0.1, 0.2.

b) Using Runge-Kutta method of fourth order,
